

User manual

KVP-U45UR Projector

- Before using the product, please read these instructions carefully, and kept it safe for future reference.
- OSD options and pictures shown in this document may differ slightly from your product.
- Changes to this manual may be made without notice.

Features and design

This Projector is designed with the most advanced technology for portability, durability, and ease of use. This projector has built-in multimedia features, and support the LCD technology by using the color depth of 1.07 billion color.

Simple Computer System Setting

The projector has the Multi-scan system to conform to almost all computer output signals quickly. Up to WUXGA resolution can be accepted.

Useful Functions for Presentations

The digital zoom function allows you to focus on the crucial information during a presentation.

Lamp Control

Brightness of the projection lamp can be selected.

Logo Function

The Logo function allows you to customize the screen logo. You can capture any image on the screen.

Multilanguage Menu Display

The screen menu of the projector is available in 26 languages: English, German, French, Italian, Spanish, Polish, Swedish, Dutch, Portuguese, Japanese, Simplified Chinese, traditional Chinese, Korean, Russian, Arabic, Turkey, Finland, Norway, Denmark, Indonesia, Hungary, Czech Republic, Kazakhstan, Vietnamese, Thai, Farsi.

Convenient Maintenance Functions

Lamp and filter maintenance functions provide for better and proper maintenance of the projector.

Security Function

The Security function helps you to ensure security of the projector. With the Key lock function, you can lock the operation on the control panel or remote control. PIN code lock function prevents unauthorized use of the

projector.

Auto Setup Function

This function enables input source search, AUTO PC adjust and AUTO Keystone by simple pressing the AUTO button on the remote control.

Colorboard Function

At the time of simple projection on the colored wall, you can get the close color image to the color image projected on a white screen by selecting the similar color to the wall color from the preset four colors.

Power Management

The Power management function reduces power consumption and maintains the lamp life.

Closed Caption

This is a printed version of the program sound or other information displayed on the screen. You can turn on the feature and switch the channels.

✓ *Note:*

- The screen menu and images in the manual may slightly differ from the real product.
- The manual is subject to change without prior notice.

Safety operation guideline

Safety instructions

This document and your projector employ certain symbols to illustrate how to use your projector safely. They are described below: Please get yourself familiar with them before going through this document.

 Caution	Ignoring messages indicated by this symbol may lead to personal injuries or deaths due to human errors.
 Note	Ignoring messages indicated by this symbol may lead to personal injuries or property damage.
	High voltage inside with risks of electric shock.
	RG2.DO NOT stare into the beam. RG2.Ne regarde pas dans la poutre.

Please read this manual carefully before installing and operating your projector.

Your projector comes with a lot of convenient features and functions. You may make the most of these features and keep your projector in good working conditions by using it correctly. Invalid operation of your projector may not only shorten its life cycle but also may lead to product failure, fire, or other incidents.

In case of any operation abnormality, refer to this manual to check your operation and connections and try solutions given in the "Troubleshooting" section at end of this manual. If the problem persists, call your dealer or our service center.

Your projector's lamp is a consumable and will get dimmer after long-term use. It's normal for an older lamp to be dimmer than a newer one. Please power on and off your projector by strictly following steps given in "Power on your projector" and "Power off your projector" section of this manual. Execute regular maintenance and cleaning according to instructions set forth in "Maintaining and cleaning your projector" section of this manual. Fail to do so may shorten life cycle of your projector and its lamps sharply or even damage your projector and its lamps before long.

	Caution Danger of electric shock DO NOT open this.	
<p>Note: DO NOT remove the casing (or back cover) as this may result in electric shock. Users shall not execute any maintenance work on components within your projector except replacing lamps. Call qualified maintenance personnel in case of any maintenance requirements.</p>		

High voltage inside with risks of electric shock.

Safety operation Guideline

Notes

Caution

Safety precautions:

- GROUND your projector.
- Lens of your projector projects strong light. DO NOT look at the light beam directly. You may get your eyesight hurt. This is especially the case with children.
- Unplug the AC power plug if your projector will not be used for long time.
- DO NOT overload the socket of power cord as it may lead to fire or electric shock. DO NOT subject the power cord to any object. DO NOT place your projector in locations where its power cord may become damaged by treading by passersby.
- Disconnect the power plug before cleaning your projector. DO NOT apply liquid or sprays to your projector. DO NOT wipe your projector with wet cloth.
- Please follow warnings and instructions given in labels attached to your projector. Unplug your projector when your projector is exposed to thunderstorm weather, is unmanned, or not in use for long periods to prevent damage caused by lightning and power surges.
- DO NOT use accessories without recommendation by the manufacturer as it may result in potential risks.

Caution

Precautions on air outlet:

- Keep adequate clearance around your projector for its ventilation and cooling. See figure below for the least clearance requirements. The least clearance is a MUST when your projector is placed within a cabinet or other closed environment.

- DO NOT cover the air outlet of your projector. Poor ventilation not only shorten life cycle of your projector but also may lead to risks.
- Slots and openings at rear and bottom of your projector are designed for ventilation. Keep your projector from overheated to ensure its steady operation.
- DO NOT cover the air outlet with cloth or other objects. DO NOT place your projector on the surface of bed, sofa, carpets, or similar object as this may block the air outlets at its bottom.
- DO NOT place your projector in closed environment, e.g. a bookcase, unless it is well ventilated.
- Keep any matter from falling in your projector through the air outlets as they may touch high voltage parts and lead to fire or electric shock by short circuits. DO NOT splash liquid to your projector.

Caution:

Precautions on location of your projector:

- Place your projector in a proper location or it may result in fire.
- DO NOT expose your projector in rain or high humidity environments or it may result in fire or electric shock. DO NOT your projector near water or splashing water. DO NOT place any water container, e.g. flower vase, atop your projector.
- DO NOT place your projector in environments of soot, moisture or smoke, e.g. your kitchen, or it may lead to product failure or accidents. Your projector may be damaged by contact with oil or chemicals.
- DO NOT place your projector near exhaust pipe or air conditioning equipment.
- DO NOT place your projector near radiator or heating pipes.
- DO NOT place your projector atop unstable truck, rack, or table. It may fall off the surface and lead to personal injuries and property damages. Please use cart or rack recommended by the manufacturer or included with your product. Please follow steps given in installation guideline included with the wall and ceiling mount racks for installation. Use installation components approved by the manufacturer.
- Be careful when moving your projector with cart. Abrupt stops, pushing too hard and rugged surfaces may topple your projector and the cart together.

FOR EU USERS

The symbol mark and recycling systems described below apply to EU countries and do not apply to countries in other areas of the world.

Your product is designed and manufactured with high quality materials and components which can be recycled and/or reused.

The symbol mark means that electrical and electronic equipment, batteries and accumulators, at their end-of-life, should be disposed of separately from your household waste.

Note:

If a chemical symbol is printed beneath the symbol mark, this chemical symbol means that the battery or accumulator contains a heavy metal at a certain concentration.

This will be indicated as follows: Hg: mercury, Cd: cadmium, Pb: lead In the European

Union there are separate collection systems for used electrical and electronic equipment, batteries and accumulators.

Please, dispose of them correctly at your local community waste collection/recycling centre.

Please help us to conserve the environment we live in!

Caution:

Contains mercury

For more information on safe handling procedures, the measures to be taken in case of accidental breakage and safe disposal options visit: ec.gc.ca/mercure-mercury/

Dispose of or recycle in accordance with applicable laws.

Safety operation Guideline

Note:

Precautions on using your projector:

- DO NOT project the same image for long time as residual images may be left in the panel. This is a property of LCD panel.
- Use power as indicated in tags attached to your projector. If you have doubts over available power type, consult your dealer or local power company first.
- DO NOT open or remove the casing for maintenance as this may lead to electric shock or other damages. Call qualified maintenance personnel in case of any maintenance requirements.
 - In case of the following, unplug the power cord and call qualified maintenance personnel for service immediately:
 - a. Damaged or broken power cord or plug
 - b. Liquid splashed in your projector
 - c. Your projector exposed to rain or water
 - d. If your projector fails to work as expected by following operation instructions, adjust it according to given instructions. Other invalid operations may damage your projector, which requires the technician to spend more time before returning it back to normal.
 - e. The projector falls off to ground or its casing is damaged.
 - f. In case of any abnormal change in your projector during its use, then maintenance services would be required.
- In case components replacement is required, make sure the replacements have been approved by the manufacturer and features the same with the one being replaced. Use of unauthorized parts may lead to fire, electric shock or personal injury.
- After the completion of maintenance or repair work, get the maintenance personnel to run routine safety check to ensure your projector's safety operation status.

Information for users in the European Union

This is a device to project images onto a screen, etc., and is not intended for use as indoor lighting in a domestic environment.

Directive 2009/125/EC.

NOTE FOR CUSTOMERS IN THE US

(Hg) LAMP(S) INSIDE THIS PRODUCT CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL STATE OR FEDERAL LAWS.

Air ventilation

Openings in the casing are designed for ventilation and overheating prevention. DO NOT block or cover these openings to keep your projector in normal operation and from overheating.

Note:

Heat exhaust at the air outlet Keep the following in mind when using or installing your projector:

- DO NOT place flammable materials or sprayers near your projector.
- Keep the air outlet one meter away from other objects.
- DO NOT touch the area close to the air outlet especially the metal components, e.g. screws. This area and parts will get very hot once your projector starts operating.
- DO NOT place any object atop your projector. They may not only be damaged but also lead to fire after being overheated.

Cooling fans are designed for cooling your projector. Fan speed is auto adjusted subject to internal temperature of your projector.

Air outlet
(For heat exhaust)

Air intake

Place your projector correctly

Use your projector at specified location in correct way. Invalid projector location may shorten life-cycle of lamps or even lead to severe incidents or fire.

Note:

Avoid installing your projector as illustrated below.

DO NOT tilt your projector more than 10 degrees.

DO NOT tilt your projector more than 10 degrees.

DO NOT put the projector on a vertical projection.

DO NOT put the projector upside down to make a projection.

DO NOT put the projector on a horizontal projection.

Note:

Precautions on ceiling mount racket installation:

- Get qualified technician to install the ceiling mount racket.
- Warranty of your projector does not cover hazards and damage caused by using ceiling mount rackets provided by unauthorized dealers.
- Remove the ceiling mount racket when it is not in use.
- Apply torque driver instead of power driver or impact driver in your projector.

Safety operation Guideline

Moving your projector

When moving your projector close its adjustment legs as they may damage the lens and casing. Keep your projector in suitable box when it is not to be used for a long time.

Note:

Precautions on moving or shipping your projector:

- DO NOT drop or impact your projector as it may get damaged or failed in operation.
- Please employ proper container for movement.
- Prohibit express or other shipping service provider personnel from shipping your projector with improper boxes. Your projector may become damaged. Please consult your dealers for shipping your projector by express or other shipping service providers.
- Place your projector in box only after it has been fully cooled down.

Precautions on dealing with your projector:

DO NOT lift or move your projector by holding the lens or projecting decoration ring as it may damage the lens and your projector.

Be careful when handling your projector. DO NOT drop it, subject it to external forces, or place objects atop it.

Note:

Projection lens are manual ones. Precautions on using your projector:

- DO NOT touch the lens when it is working as your fingers may get hurt.
- DO NOT let children touch the lens.

DO NOT hold the lens or area around it.

FCC

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Accessory

Accessory for Solo high-end series as follows:

<p>AC Power Cord</p>  <p>Note: the AC power cord specification depends on the location of your projector.</p>	<p>Remote Control With Batteries (AAA*2)</p> 
<p>Quick Start Guide</p> 	<p>VGA Cable</p> 

Name and function of your projector

Front/Top

- ① Zoom ring
- ② Focus ring
- ③ Top control panel
- ④ FILTER
- ⑤ Remote Receiver (Front)
- ⑥ Projection lens

Rear

- ⑦ Speaker
- ⑧ Anti-theft lock hole
- ⑨ AC Power Cord port
- ⑩ Remote receiver (back)
- ⑪ Kensington Security Slot

⚠ Note:

- Kensington Security Slot is for a Kensington lock used to deter theft of the projector.
- Kensington is a registered trademark of ACCO Brands Corporation.

Bottom

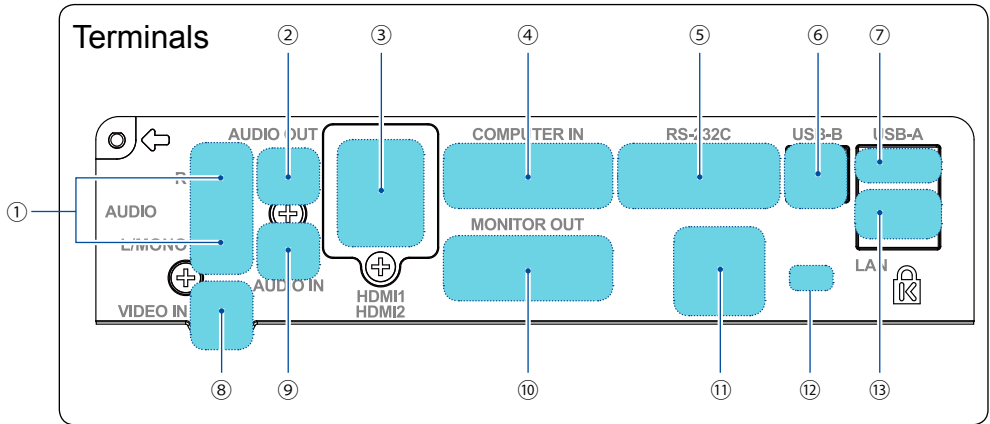

- ⑫ Adjustment pad

⚠ Note:

Donot place your hands or other objects near the vent:

- Vent will shed heat. Do not put your hands or face, or thermolabile objects placed near the outlet . You need keep at least a distance of 3" (1m) away, or it may cause it burning or damage.

Name and function of your projector

① MONO(L/R) terminal

A MoNo audio signal (A single audio terminal) should be connected to the MONO (R / L) interface.

② AUDIO OUT terminal

Connect external audio devices to this terminal.

③ HDMI1/HDMI2 connector

Connect HDMI1 digital output signals or HDMI2 digital output signals to this terminal.

④ COMPUTER IN

Connect RGB to this terminal.

⑤ RS-232C

When using the RS232 functional to operate the projector, connect the serial communication to this terminal.

⑥ USB-B connector

When using the "USB display" function, connect your computer to this terminal via the USB cable.

⑦ USB-A connector

When using the Memory Viewer function, insert the USB memory directly to this terminal.

⑧ VIDEO IN terminal

Connect video output signal to this terminal.

⑨ AUDIO IN terminal

Connect audio signal of the PC to this terminal.

⑩ MONITOR OUT terminal

For monitor output, output the signal from ④ to other monitors.

⑪ Remote Receiver (rear)

Use the remote control to operate the projector.

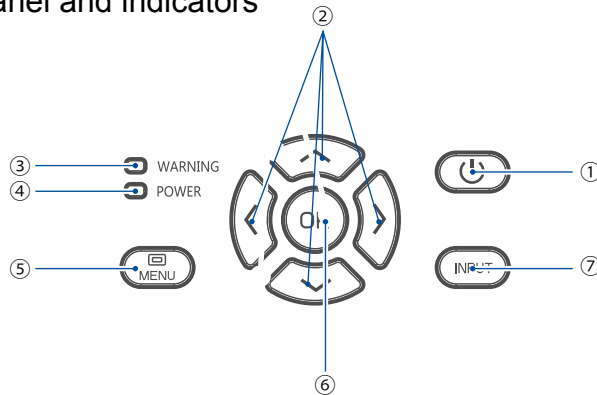

⑫ Kensington Security Slot

When using the "Kensington Security Slot" function, it will help users to deter theft of the projector.

⑬ LAN terminal

Connect mesh cable to this terminal when using network control and operate your projector.

Top control panel and indicators

① **POWER**

Open or close the projector.

② **Arrow ▲ ▼ ◀ ▶ /UP/DOWN/VOL-/VOL+**

- Select items or adjust the data in the OSD menu.
- Shift the image in the "Digital zoom +/-" mode.
- Adjust the volume.

③ **WARNING indicator**

- The indicator is flashing red, when the internal temperature of the projector exceeds the operating range.

④ **POWER indicator**

- The POWER indicator turns steady red, when the projector is in standby mode,
- The POWER indicator turns steady green, during the working time.
- The POWER indicator is flashing green, when the projector is in power management mode
- The POWER indicator is flashing red, when the projector is in cooling mode.
- The POWER indicator turns steady green yellow, when the projector power is abnormal.

⑤ **MENU**

Open or close the OSD menu.

⑥ **OK**

- Enter the OSD menu
- Select options in the OSD menu .

⑦ **INPUT**

Open or close the INPUT menu.

Name and function of your projector

Remote controller

① **POWER**

Power on or off your projector .

Enter the screen size adjustment menu.

⑬ **LAMP**

Select LAMP mode.

⑭ **FREEZE**

Freeze projected images.

⑮ **PATTERN**

Select built-in test pattern of your projector.

⑯ **INFO.**

Display current status info. of your projector .

⑰ **MUTE**

Turn off the sound Temporarily.

⑱ **D.ZOOM +**

Zoom in projected image .

⑲ **D.ZOOM -**

Zoom out projected image .

⑳ **VOLUME +**

Increase volume.

㉑ **VOLUME -**

Decrease volume .

㉒ **BLANK**

Dark out screen images temporarily.

㉓ **TIMER**

Enable the timer function .

PATTERN button on the remote controller is invalid when you choose USB display, Memory viewer and Network as input signal.

Install battery of remote controller

1 Open the battery cover.

2 Insert a new battery in it.

Two AAA batteries

Place batteries with its anode and cathode (+ and -) in correct direction. Keep both poles in good connection to the contacts within the compartment.

3 Put the cover back.

Please follow the following rules for safety operation:

- Use two of AAA batteries.
- Replace both batteries at the same time.
- Do not mix new and old batteries as one pair.
- Keep your remote controller away from water or other liquids.
- Do not expose your remote controller to environments with high humidity or temperature.
- Do not drop your remote controller.
- In case of any battery solution leaking in the compartment, clear it thoroughly before placing new batteries in it.
- Using battery of other types than what specified on this manual may lead to risks of explosion.
- Please dispose your old battery by following instructions given in tag of the battery or local regulations.

Remote controller operation range

Point your remote controller to the IR receiver of your projector.

Maximum operation range of your remote controller is about arc 30° and with about an area of radius 6 meters or about 8 meters in straight line.

Installation

Set up your projector

- Ambient brightness may affect your projection image quality. For the optimal image effect, it is recommended to control brightness in your environment.
- Values shown in figure below are approximates only. They may differ from the actual ones.

Installation

Adjust the projected image

Adjust the position of the projected image

1. Place the projector so that it is perpendicular to the screen, just show as below Image (1).
2. Raise the front of the projector and press the foot lock on the projector.

Loosen the foot lock can lock the adjustable foot. Rotate the adjustable foot to adjust the height.

Rotating the adjustable foot in the direction shown in the Image (2) to lengthens it, and rotating in the opposite direction retracts it, thus adjusting the projection angle of the vertical direction.

(* This cable is not included.)

External audio devices

Unplug power cords of your projector and all external equipment before connecting any cable to them.

Installation

Connect to USB and Wireless card (USB-A and USB-B)

Cables for connection:

- USB-A or USB-B cable*

(* This cable is not included.)

Unplug power cords of your projector and all external equipment before connecting any cable to them.

Connect the AC power cord

Standard voltage employed by your projector is AC 100-240V. It adapts to different input voltage automatically. Your projector employs single-phase power cord with neutral ground cable.

Do not use any other type of power cords or you may face the risks of electric shock. In case you have any doubt on type of power cord you are using, please call authorized dealer or service center for help. Before powering on your projector, get all external equipment connected in advance.

Note:

Keep your AC power socket close to your projector for easy plugging and unplugging.

✓ Note:

For safety reasons, unplug the AC power cord when your projector is not in use. Your projector will consume a small amount of power when it is connected to AC grid power and in standby mode.

Connect included AC power cord to your projector.

Precautions on power cord

Your AC power cord should meet regulations of the country/district where your projector is used.

Please make sure the type of the power plug is compliant with those given in figure below. Make sure you are using a valid AC power cord.

In case the included AC power cord does not comply with the AC power socket in your location, call your dealer for replacement.

The projector side	Connect to the AC power socket
 <p>Connect to power cord connector of your projector</p>	 <p>Connect to AC power socket</p>

✓ Note:

- Use of invalid power cord may hamper product performance or even lead to electric shock, fire, and other incidents. Please use power cord compliant with the included one to ensure product performance and operation safety.
- The frequently used cables are: AC power cord, VGA cable, audio cable, video cable, and serial control cable.

Basic operation

Power on your projector

1. Connect all external equipment to your projector (e.g. computer or camera) before powering it on.
2. Connect AC power cord of your projector to an AC power socket. The Power indicator turns on in red.
3. Press the Power button on the top control panel or the remote controller.
The Power indicator lights in green and the cooling fan starts running.
4. If your projector is setting as password protected, the password dialog box displays. Enter your password as instructed below.

✓ Note:

- In case the “Logo Select” option is set to OFF, then no welcome image will display in screen.
- You can do nothing but powering off your projector during the welcome image is displaying.

Enter password (PIN)

Press ▲▼ button to select a number, press ► button to enter it and move the cursor. The number you typed is displayed as “*”. To edit number you have entered, press ◀ button to move the cursor to the number you want to change, press ▲▼ button to select the correct one.

Repeat this step to type in a 3-digit number.

Move the cursor to SET after you have typed the 3-digit number. Press the OK button and now you are ready to use your projector.

If the password is invalid, the password displayed as “***” will be in red. Please try again with a valid one.

Move the cursor to Set button, then press the OK button.

What is a password (PIN)?

A password (PIN) is an ID code for identifying people with knowledge about it to operate your projector. A password (PIN) setting may help preventing your projector from unauthorized use.

Your password (PIN) code is a 3-digit number. To find out more about protecting your projector with a password (PIN), please refer to the PIN Code Lock function in the Setup menu on Page 56 for details.

Precautions on password (PIN) operation

You cannot operate a password (PIN) protected projector without correct password (PIN). Please set up a new password (PIN) and keep your operation manual in safe place. In case the password (PIN) is lost or forgotten, call your dealer or service center.

Power off your projector

1. Press the Power button at the top control panel or the remote controller, the "Power off?" message displays.
2. Press the Power button again in 4 seconds after the "Power off?" message prompted to you. The POWER indicator flashes red while the cooling fan continues running. (You may set up noise level and speed of the fan.) Unplug the power cord until the fan stops running. Failure to do so may shorten life cycle of your projector or lead to power on failures or operation abnormalities.
3. The POWER indicator stops flashing once the projector has been cooled down to ready for power on again.

"Power off?" message disappears in 4 seconds.

To maintain the life cycle of the lamp, power off your projector after it has been turn on for at least five minutes.

Do not use your projector without stop. As it may hurt the life cycle of your lamp. Power off your projector at least once every 24 hours and have it idle for an hour.

✓ Note:

- If the "On Start" function is set to "On", your projector will power on once it is connected to an AC power socket. (Refer to page 46)
- Speed of the cooling fan varies with internal temperature of your projector.
- Do not place your projector in any box before it is fully cooled down.
- In case the POWER indicator flashes or turns red, refer to the "Status light indicator" for instructions. (Refer to page 93)
- The POWER indicator flashes when the lamp is cooling down. Do not power on your projector at this time. Power on your projector only after the POWER indicator turns red.
- Unplug the power cord after your projector has been turned off. The fan stops running.
- The POWER indicator turns red when your projector is ready for power on again. It takes less time to restart your projector after it was powered off in the standard power off procedure than that of the non-standard one.

Basic operation

How to operate the OSD

You can adjust or set up the projector on the on-screen menu.

The menu has a multilayer structure. Each main menu is divided into several sub-level menus, then each submenus is divided into several submenus.

Please refer to the appropriate section of this manual for the procedure for the adjustment and settings.

Remote controller

Rear control panel

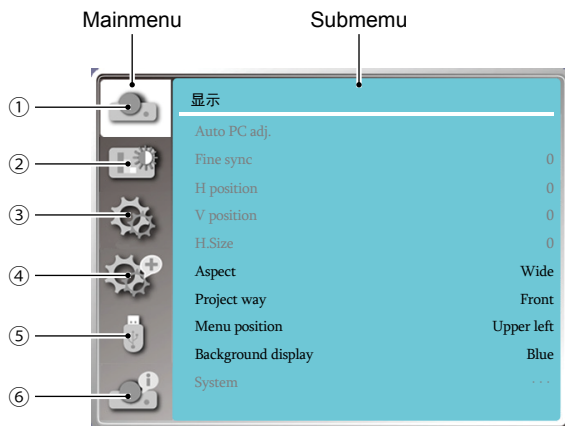

1. Press the MENU button on the top control panel or remote controller and the OSD displays.
2. Press ▲▼ button to act on or select one mainmenu item. Press ► button or OK button to enter a submenu.
3. Press ▲▼ button to select required sub-menu, then press OK button or ► button to set up or enter an option.
4. Press ▲▼ button to select settings or navigate options, then press OK button to act on the item and exit.
5. Press ◀ button to return to mainmenu. Press the MENU button on remote controller or control panel to exit the OSD.

OSD Menu

Menu item overview

- ① Display menu
 - Select Auto PC adj., Fine sync, H Position, V Position, H. size to adjust the parameters to match the VGA format.
 - Aspect : Normal, Widescreen, Fullscreen, Advanced.
 - Project way: Choose Front, Rear, Ceiling / Front, Ceiling / Rear, Auto ceiling/Front and Auto ceiling/Rear .
 - Menu position: Set screen menu display position on the screen.
 - Background display: Sets the background color of the projection screen.
 - System: Select the compatible system signal format with input source .
- ② Color adjust menu

Available options in the Image Select menu are Dynamic, Normal, Cinema, Blackboard (Green), Colorboard, or User Image.

 - For AV signal input ,the available color adjust options : Contrast, Brightness, Color, Tint, White balance(Red, Green, Blue) and Sharpness.
 - For PC signal input ,the available color adjust options :Contrast, Brightness, Color temp. , White balance(Red, Green, Blue) and Sharpness.
- ③ Setting menu

Configuration of the basic function operation on the projector: On start, Standby mode, High land, Lamp control, Cooling fast , Closed caption, Key lock, Iris, Terminal, Sound and HDMI Setup.
- ④ Expand menu

Available adjust options are Language, Auto Setup, Keystone, LOGO , Security, Power management, Filter counter, Test pattern, Network, Factory default and Lamp counter.
- ⑤ Memory Viewer menu

Select Parameter Of Set slide, Slide transition effect,Sort order, Rotate, Best fit, Repeat, Apply .
- ⑥ Information menu

Display information about the projector.

Basic operation

Adjust the Projector Zoom and Focus

1. Rotate the zoom ring from the center, Rotate the picture to the left to zoom out or Rotate the picture to the right to zoom in.
2. Rotate the focus ring to adjust the focal length of the image, and adjust it to be clear according to the display content of the screen.

Adjust the projector Focus

Adjust the projector Zoom

Auto setting function

Press the AUTO button on your remote controller to auto execute settings given in the Auto Setup on the Expand menu (including input search, Auto PC adj. and Auto keystone).

Remote controller

Keystone adjustment

You may adjust keystone distortion of image in your projector with the V keystone adjustment. Follow steps below to adjust keystone distortion of projected image manually.

Press the KEYSTONE button on your remote controller. The keystone adjustment dialog box displays (including H/V Keystone, Corner correction, Curved correction, Reset value) , press ▲▼◀▶ button to adjust keystone distortion.

You may save your settings for keystone adjustment.

Remote controller

H/V Keystone.....Adjust the projected image when the projector is on the horizontal or vertical keystone distortion.

Corner correction.....Adjust the projected image when the projector is keystone distortion of four corners .

Curved correction.....Adjust the projected image when the projector linearity is uneven or the projected images bent vertically and horizontally.

Reset value.....The correction values will be restored to the factory defaults.

H/V Keystone adjust

- The arrow mark looks white when there is no keystone adjustment in existence.
- The arrow mark indicating the adjustment direction turns red.
- The arrow mark disappears when the maximum adjustment limit reaches.

H/V Keystone

Corner correction
Curved correction
Reset value

Only for XGA/WXGA series

Basic operation

- The keystone prompt box will disappear if you press the KEYSTONE button again when it is displaying. Press the OK button again to switch the four correction items.
- The adjustable range is subject to source of signal input.

Only for WUXGA series

Volume adjustment

You'd better use the remote control to complete directly.

Volume

Press the remote control Volume +/- buttons to adjust the volume.

MUTE

Press the mute button on the remote control to select "ON", you can temporarily turn off the sound. Press the mute button again to select "Off" or press the volume +/- keys to re-open the audio effects.

Mute function is also effective for audio output interfaces.

Remote controller

Menu operation

1. Press the MENU button on the top control panel or remote controller and the OSD displays. Press ▲▼ button to enter setting menu, then press OK or ► button.
2. Press ▲▼ button to select sound, press OK or ► button to enter.
3. Press ▲▼ button to select volume or mute.

Volume.....Press ▲ button to increase volume.
Press ▼ button to decrease volume.

Mute.....Press ▲▼ button to switch to On or Off .

4. Press OK button to select.

Sound menu

Remote controller operation

Use your remote controller for common operations.

Freeze (FREEZE)

Press the FREEZE button on remote controller to freeze image and mute the audio. Freeze icon appears on the screen. Press the FREEZE button or any button to cancel the freeze function, then the image replay and the sound is restored.

Mute (MUTE)

Press the mute button on the remote control to turn off the sound. To remove the mute function, please press the mute button or volume +/- button to cancel the mute function.

VOLUME +/- (VOLUME +/-)

press the Volume +/- on remote controller to increase or decrease volume.

IMAGE (IMAGE)

Press the IMAGE button on remote controller to select required image mode.

LAMP (LAMP)

Press the Lamp button on remote controller to change screen brightness.

Normal.....Normal brightness.

Economical.....Lower the brightness and reduce energy consumption, thus prolonging the lamp service life.

INFO.(INFO.)

Press the information button on the remote control to display the information of the projected image and the projector's operating status.

BLANK (BLANK)

Press the BLANK button on remote controller; a blank screen displays to replace existing image. Press the BLANK button or any other button to restore the image. Press the BLANK button to toggle switch your screen as shown below:

BLANK → Normal → BLANK → Normal →

✓ Note:

For some other buttons' description, please refer to the next page.

Remote controller

The BLANK screen disappears if no buttons are pressed in 2 seconds.

Basic operation

Timer (TIMER)

Press the TIMER button on remote controller.
A timer animation (00:00) displays on the upper right corner and starts timing in format of (00:00-59:59).

Press the TIMER button to stop timing. Press the TIMER button again to disable the timing function.

Timer display

Digital Zoom + (D.ZOOM+)

Press the D.ZOOM+ button on remote controller to enter the Digital Zoom mode.

When OSD menu disappear, the screen display digital zoom + information.

*Only for input as VGA, RGBHV, and the screen size setting as Normal or Wide.

Digital Zoom - (D.ZOOM-)

Press the D.ZOOM- button on remote controller to enter the Digital Zoom mode.

When OSD menu disappear, the screen display digital zoom - information.

Press any other key to exit the Digital Zoom + / - mode

Screen size selection (SCREEN)

Press the SCREEN button on remote controller to select required screen size mode.

Press the SCREEN button on the remote control to select the size of the screen to return to the normal screen size.

Remote controller

Input selection

Basic operation

Press the INPUT button on the control panel or on the remote control to select one of the following input: VGA, Video, HDMI 1, HDMI 2, Memory Viewer, Network, USB Display. Alternatively, you may press the VGA, HDMI VIDEO button on remote controller to select VGA, HDMI1, HDMI 2, VIDEO.

Remote controller

Menu operation

- 1 Press the INPUT button on remote controller to enter the Input menu.
- 2 Press ▲▼ button to select one of the following input: VGA, Video, HDMI 1, HDMI 2, Memory Viewer, Network, USB Display, and then press the OK button to select the input source.

Top Control Panel

VGA

Select input VGA if a PC is connected to the VGA IN terminal.

HDMI 1

Select input HDMI 1 if a device is connected to the HDMI terminal.

HDMI 2

Select input HDMI 2 if a device is connected to the HDMI 2 terminal.

Video

Select input Video if a PC is connected to the Video terminal.

- ③ Horizontal position: Adjust the horizontal position of the projected image.
- ④ Vertical position: Adjust the vertical position of the projected image.
- ⑤ Horizontal Dimension: Adjust the horizontal dimension of the projected image.
- ⑥ Screen Freeze: Select the function to switch the screen freeze on and off.
- ⑦ Automatic computer adjustment: Implement the automatic computer adjustment function.
- ⑧ Vertical trapezoidal correction: Correct trapezoidal distortion in vertical direction.
- ⑨ Horizontal trapezoidal correction: Correc horizontal distortion in horizontal direction.
- ⑩ Surface correction:Correct pincushion and barrel of the projected image.
- ⑪ Angle: Correct four angles of the projected imagehe .

[Network Setup] page

Network Display System > Network Setup	
System Status	<input checked="" type="radio"/> Obtain IP Address Automatically <input type="radio"/> Use Following IP Address
General Setup	IP Address: 192.168.0.43
Picture Setup	Subnet: 255.255.255.0
Image Setup	Gateway: 192.168.0.1
Network Setup	DNS: 202.96.134.33
Apply	

① Network Setup

If you want to enable the DHCP client, select the IP address automatically.

IP address:

Please enter the IP address when you do not use the DHCP server.

Subnet :

Please enter a subnet shield,when you do not use the DHCP server .

Gateway:

Please enter the gateway ,when you do not use the DHCP server.

DNS:

Please enter the DNS address, when you do not use the DHCP server.

Available characters : digital (0 - 9), a period (.)

(For example: 192.168.0.253)

② Apply

Update settings.

Network control

5) pwPresenter Software: when the input signal source is chosen as the network, the network will be used to project computer image.

After entering the IP address of the projector in the web page to the main interface, click "Download", and download the corresponding PwPresebter software with your projector.

6 Click  the icon to enter into pwPresenter software.

① Search network projector

Click to enter to search, select the needed projector and connect it . Set the same IP address (for example: 192.168.1.100) as the projector in pwPresenter software ,and set user type as "average user", and the password is "admin".

✓ NOTE

- Before using the pwPresenter search, please switch to network signal source.

② Screenshot start or pause

Start or pause the selected pictures.

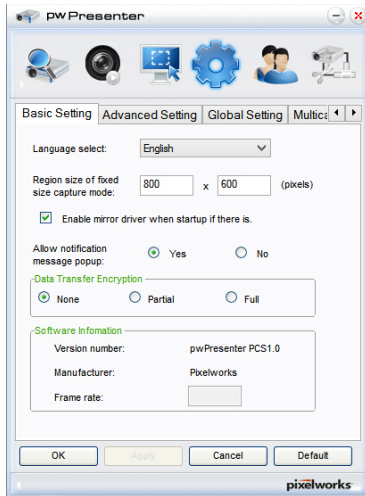

③ Select screenshot mode .

Select screenshot mode from the "full range", "fixed size" or "variable size" and

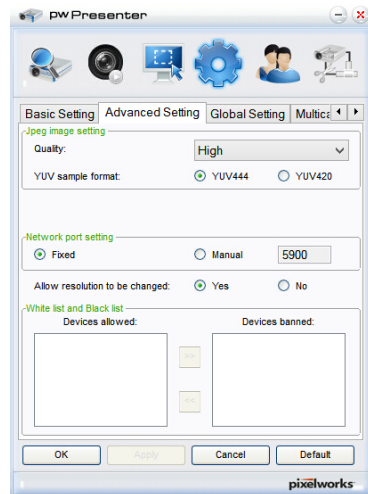

④ Parameter Setting

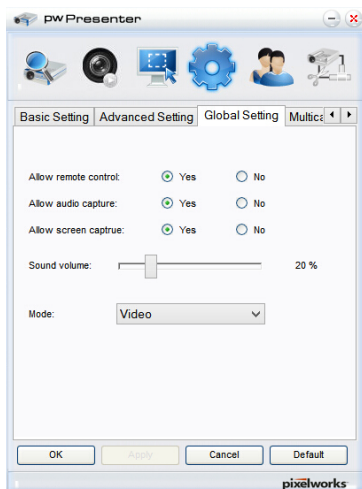

Basic setting: Language, Capture region size etc.

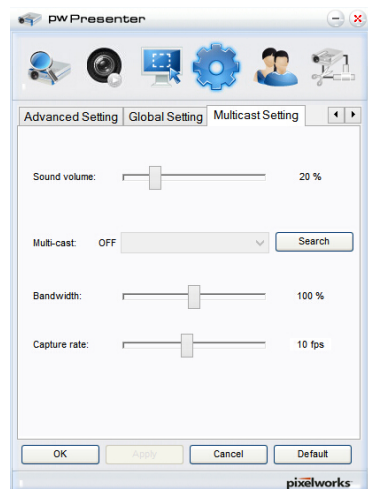

Advanced setting: JPEG image setting, Network port setting, White list and Black list etc.

Global setting: Remote control setting, Sound capture and Screen capture, etc.

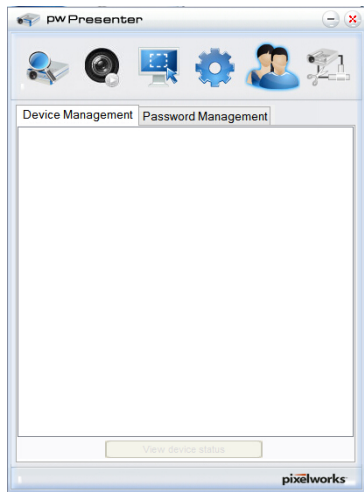

Multicast setting: Volume setting, Bandwidth, Sampling frequency, etc.

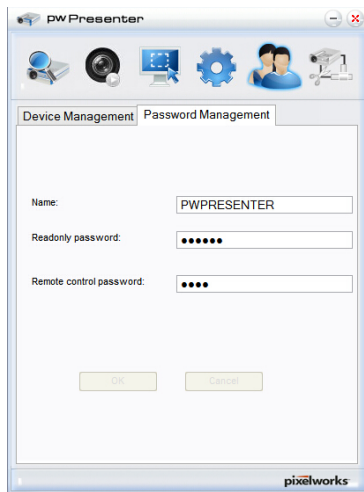

Network control

- ⑤ Network Projector Management
Set pwPresenter network user name and password etc.

- ⑥ Cut off projector connection.

Memory Viewer function

When the USB memory is inserted into the projector, the viewer memory function can project the video and pictures stored in the USB memory.

■ The projected content of Memory Viewer function
Memory Viewer function supports the following picture files.

Video	Extension name	Video Codec	Audio Codec	Video Format
	avi	MotionJPEG	ADPCM	Maximum 1280x720,30fps

Maps	Extension name	Format	Description
	jpg/jpeg	Baseline encoder 24 Progressive RGB24 bit	Max resolution: 10000x10000 Max resolution: Panel Resolution
	bmp	1,4,8 bit palette-based RGB24,32 bit	Max resolution: 1280X800
	png	24, 48-bit True Color	-24-Bit color palette space Max resolution: 1024x768
	gif	1,4,8-bit palette-based	Max resolution: 800x600
	tiff		Max resolution: 800x600

Display memory viewer screen

When the USB memory is inserted into the projector, the viewer memory function can project the video and pictures stored in the USB memory.

- 1) Press INPUT button on the control panel and on the top control panel and select the input source of [Memory Viewer].
- 2) Insert the USB memory into the <USB (browser) > terminal directly.
 - Press RC enter to display standby screen instantly, while the USB memory icon displays in the left corner of the screen.
 - When the USB memory is independent of the partition, it will display more than one USB icon.
- 3) Press ▲▼ button to switch required items.
 - The root directory of the USB memory is displayed in a thumbnail.

Play image

Only one image shows on the screen when you play it.

- 1) Press ◀▶ button to select a file.
- 2) Press <OK or ▶> button.
 - Full screen display
- 3) Press <OK> button.
 - Press <OK> to return the thumbnail.

Useful function

Play slide

The Slide Show Mode in the Memory Viewer menu is set to a special setting ,all images in the same folder can play automatically.

- 1) Press ◀▶ button to select a file.
- 2) Press ▲▼ button to select [Memory Viewer] menu,then select [From Scratch] menu.
- 3) Press <OK> button.
 - Full screen display
 - Press <OK> button to return the thumbnail.

Play video

Play video files.

- 1) Press ◀▶ button to select a file.
- 2) Press <OK> button.
 - Full screen display
 - Use the remote control to operate the controller that appears at the bottom of the screen.

	Stop playing the video and return to the thumbnail
	Pause / play the video
	Video fast forward / backward
	Video fast forward / backward at the twice speed.
	Each time press the icon , the box switches . When the box appears, the video can playback.

The termination of Memory Viewer

The Slide Show Mode in the Memory Viewer menu is set to a special setting ,all images in the same folder can play automatically.

- 1) Press ◀▶ button to select  ,displayed in the left corner of the screen.
- 2) Press <OK> button.
 - Please Press RC ENTER to display standby screen instantly.
- 3) Unplug the USB memory directly.

Note

- When you insert a USB memory, please make sure insertion direction to avoid damaging the port i.
- Please note the following points when inserting and removing USB memory:
 - a. The indicator flashes, when the USB memory insert into the projector or the projector is reading data. DO NOT remove the USB memory When the light is flashing.
 - b. If you use a USB memory device without lights, the projector will not recognize when reading data. Please close its browse function on and turn off the projector , then remove the USB memory.
 - c. Do not install and remove USB memory frequently. Then remove it after the installation of at least 5 seconds. After removing at least five seconds and then reinstall it. The projector is on switch mode during the operation, when installing or removing the USB memory.

Precautions on processing and storage of USB memory

- Please DO NOT place the USB memory or the lid where children can reach. Swallow USB memory or the lid may cause choking.
- If smoke or produce abnormal smell, close the external device and contact the dealer.
- DO NOT let the water, chemicals or oil into the USB memory, or it may cause a short circuit or fire.
- DO NOT put foreign matter or metal items in the USB port. Static electricity may cause data loss or data damage.
- when USB memory is read or written, DO NOT remove USB memory from the computer or projector , otherwise it may result in data loss or corruption of data.
- Please do not put the USB memory in high temperature, damp or dusty place, or next to magnetic materials.

NOTE

It allows the insertion or removal of the USB memory when the projector is in any power status.

USB display function

Select this function to can project the image and audio from the computer through the USB converter cable.

When using Windows:

■ Windows operating environment

Operating System	Vista Windows 32, 32/64 Windows7, Windows 8 32/64
CPU	Intel Core 2 Duo 2.0 GHZ or faster compatible processors
Memory Capacity	256MB or above (512MB or above)
Disk Space Available	20MB or above
Monitor	Resolution 640x480 or above, 1600x1200 or above

Useful function

CAN NOT guarantee that the PC meeting the above conditions can operate normally .

Project USB display

- 1) Using USB-B cable to connect the projector to the USB display terminals.
 - Items in grey are not available.
- 2) Press the information source menu on the remote controlor the INPUT button on the control panel, then select [USB display] in the input source menu.
- 3) Press the driver icon in the computer drive in the computer's task bar ,the select one item in the pop-up menu bar.
 - Pop-up menu only display in English.

[Active audio] /[Disable audio]	Sets up the output from the computer's audio.
[Play video] / [Pause video]	Switch on playing and pausing images.
[Start / Stop]	Sets up the output from the computer's image.
[Exit]	Gray means not optional

 NOTE

- Resolution of the computer screen will be switched.
- If the drive is not installed on the computer, the driver will be removed when the USB cable is disconnected .
- You need wait for a moment,if you want project computer screen.
- Connect the USB cable directly to the computer's USB connector. When connecting the USB hub, it may be abnormal.

The termination of USB display

- 1) Remove the USB cable directly,when terminate USB monitor.
 - You never need follow "Remove Hardware Safely, when USB cable is not connected.

When using Mac OS

■ Mac OS operating environment

Operating System	Mac os x 10.5,10.6,10.7
CPU	Power PC G4 1GHz or faster compatible processors
Memory Capacity	512MB or above
Disk Space Available	20MB or above
Monitor	Resolution 640x480 or above, 1600x1200 or above

CAN NOT guarantee that the PC meeting the above conditions can operate normally .

Project USB display

- 1) Using USB-B cable to connect the projector to the USB display terminals.
 - Items in grey are not available.
- 2) Press the information source menu on the remote controlor the INPUT button on the control panel, then select [USB Monitor] in the input source menu.
- 3) Double-click "Monitor.app" button installed on the virtual disk.
 - Project image on the computer screen.
- 4) Press the driver icon in the computer drive in the computer's task bar , the select one item in the pop-up menu bar.
 - Pop-up menu only display in Chinese.

[Active audio] / [Disable audio]	Sets up the output from the computer's audio.
[Play video] / [Pause video]	Switch on playing and pausing images.
[Start / Stop]	Sets up the output from the computer's image.
[Exit]	Terminate USB Monitor

NOTE

- Resolution of the computer screen will be switched.
- You need wait for a moment,if you want project computer screen.
- Connect the USB cable directly to the computer's USB connector. When connecting the USB hub, it may be abnormal.

The termination of USB display

- 1) Remove the USB cable directly,when terminate USB display.

Maintenance and cleaning

WARNING light indicator

The WARNING light indicator shows status of projector protection function. Check warning and POWER light indicator for good maintenance operation.

Note:

Unplug the AC power cord in case of any abnormality as it may lead to fire or electric shock.

The projector turns off and the WARNING indicator flashes red.

Your projector powers off automatically to protect components within it when it is overheated. The POWER indicator flashes when your projector is cooling down. Press the POWER button to power your projector on again when it is cooled down to normal operation temperature.

WARNING

POWER

The WARNING indicator
flashing red

✓ Note:

The POWER indicator stops flashing when your projector's internal temperature cooled down to normal and it is powered on again.

Check the following:

- Is adequate clearance provided for your projector's ventilation? Check the installation status and any air outlet block.
- Is your projector installed at location close to outlet of air conditioning equipment? Keep your projector away from air outlet of air conditioning equipment.
- Is the filter in clean condition? Please clean the filter regularly.

The power is abnormal and the POWER indicator turns steady yellow.

The POWER indicator turns steady yellow and your projector powers off to protect its internal components whenever an abnormality is detected. Unplug the AC power cord and connect again. Restart your projector and run checkup routine. If the problem persists, unplug the AC power cord and call your service center for checkup and maintenance.

WARNING

POWER

The POWER indicator
turns steady yellow

Maintenance and cleaning

Clean your projector when it is contaminated by foreign matter or its display effects are getting worse.

Note:

Unplug the AC power cord before any cleaning operation.

Clean the lens

Wipe the lens with clean cloth dampened with non-abrasive camera lens cleaner or clean it with lens cleaning paper or air blower.

Do not over apply cleaner to the lens. Abrasive cleaner, solution, or other rough chemical may scratch the lens.

Clean casing of your projector

Wipe the casing surface with clean and soft cloth. Gently wipe the casing with clean and soft cloth dampened with small amount of neutral detergent to remove heavy dirt. Do not over apply cleaner to the casing. Abrasive cleaner, solution, or other rough chemical may scratch the casing surface.

Place your projector in proper container after use to protect it from dirt and dust and being scratched.

Clear the filter

The filter is designed to keep dust from entering in your projector, which may lead to dusts accumulated on surface of internal components. Clogged filter may reduce cooling fan effects, which, in turn, will overheat your projector and shorten its life cycle. Clean the filter immediately whenever the Filter Warning icon displays.

Please follow these steps to clean your filter:

- 1 Power off your projector and unplug from AC power source.
- 2 Remove the filter.
- 3 Gently clean it with a brush.
- 4 Replace the filter. Make sure it has been fully inserted.

Filter counter

Note:

Do not operate your projector after its filter is removed. Dust may attach to the lens assembly and deteriorate image quality.

Do not insert any small object in the air outlet. It may fail your projector.

Maintenance and cleaning

Reset the filter counter

- 1 Press MENU button and the OSD displays. Press ◀▶ button to select Setup menu, press ▶ button or OK.
- 2 Press ▲▼ button to select "Filter Counter", press ▶ button or OK. Press ▲▼ button to select "Reset the filter counter" and press OK. The "Reset filter counter?" message displays. Select Yes to proceed.
- 3 In another pop-up dialog box, select Yes to reset the filter counter.

Recommendations

Please do not use your projector at place of dust and smoke. This may affects image quality. Using your projector in place of dust and smoke may lead to piling dusts on lens, LCD panel, and lens components within it. In case like this, call your dealer or service center for correct cleaning.

Note:
Reset the filter counter after its cleaning or replacement.

Lamp replacement

The lamp warning icon displays when its usage time are more than the life of the projector minus 300H and less than the life of the projector.

The lamp replacement icon displays when its usage time are more than the life of the projector.

The lamp warning icon

The lamp replacement icon

Lamp model

Your projector's lamp is a consumable. You can confirm your usage time according to "Lamp counter" on the Info. menu in Page 64.

You'd better ask a professional technician to replace the lamp. Contact your dealer for help.

Please call your dealer to replace the lamp .

Recommendations

DONOT replace the lamp when it is so hot .Make sure to replace it at lease 1hour later after using it.

The internal cover of lamp model is getting hot in use. Take care, or you may get burned.

The lamp model

Note:

Do not replace the lamp after it went dark as it may be broken. Always assume the lamp of a ceiling mount your projector is broken when replacing it. Stand beside the lamp cover instead of below it. Remove the lamp cover gently. Small piece of glass debris may fall off when opening the lamp cover. Consult with a doctor immediately if there is any glass debris fell in your eyes or mouth.

Note:

Let your projector cool for at least 45 minutes before opening the lamp cover, as temperature within your projector is high.

Note:

Replace the lamp with a new one of the same model just in case. Do not drop or touch the lamp! It may break and lead to personal injuries.

Follow steps below to replace the lamp:

1. Power off your projector and unplug the AC power cord. Let it cool down for at least 45 minutes.
2. Open the lamp cover after removing screws holding the cover.
3. Loose all 3 screws fixing the lamp. Remove the lamp by holding its handle.
4. Replace with a new lamp and tighten all 3 screws. Make sure the lamp has been installed correctly. Close the lamp cover and tighten the screw.
5. Connect your projector to an AC power source and power it on.

Precautions on lamp operation

Your projector employs high voltage lamp, which requires careful and correct operation. Fail to do so may lead to accidents, personal injuries, or fire.

- Life cycle of lamp varies with environment it is in service. Life cycle of lamp varies. That is, some lamps may last longer than their counterparts.
- If your projector prompts you to replace lamp (by showing a lamp replacing icon) then replace it with a new one after powering it off and it is fully cooled down. (Please replace lamp by strictly following steps given in this manual.)
If you keep on using the lamp after being prompted to replace it then you are exposed to greater risks of lamp explosion.
- Lamp may explode due to external impact and shock. Risks of explosion vary with projector and use environment and status of the lamp.

In case of lamp explosion, take the following safety measures:

Disconnect your projector from power source immediately in case of lamp explosion. Call authorized service center to inspect your projector and replace lamp. Make a thorough inspection to ensure every piece of debris after explosion has been removed. Remove every piece of debris after explosion. No one else may inspect the internal of your projector except those authorized and well trained technician who also are familiar with its maintenance. Or we shall not be held liable for the consequences.

Appendix

Troubleshooting

Check the following before calling your dealer or service center:

Troubleshooting	Solution
Power on failure	<ul style="list-style-type: none">– Plug the power cord of your projector in an AC socket.– Make sure the POWER light indicator turns red.– Restart your projector until the POWER light indicator turns red. It indicates your projector is ready for power on again.– Check the lamp.– Disable the Key Lock function of your projector.
Logo screen display failure	<ul style="list-style-type: none">– Make sure the Off and Countdown Off is selected in the Display function.
The Logo screen differs from the standard settings.	<ul style="list-style-type: none">– Make sure you did not select User or Off in the Logo Screen.
Input signal switch (or do not switch) automatically.	<ul style="list-style-type: none">– Make sure you have correctly set up the Input Search function.
Press INPUT button during power on and a non-input mode icon displays.	<ul style="list-style-type: none">– This is a filter or lamp replacement alerts.
A non-input or lamp mode icon displays.	<ul style="list-style-type: none">– This is a filter replacement alerts.
Image looks fuzzy	<ul style="list-style-type: none">– Adjust focus of your projector.– Provide proper projection distance.– The projection lens requires cleaning.– Moving your projector from a colder environment to a hotter one may result in condensing on the lens. If this is the case, wait until the condensing water evaporated before powering on your projector.
Image mirror reflected Image turns upside down	<ul style="list-style-type: none">– Check the Ceiling and Rear settings.– Check the Ceiling settings.
Image looks dim	<ul style="list-style-type: none">– Check for contrast and brightness settings.– Check for correct image mode settings– Check for lamp brightness settings.– Check for lamp replacement alert. The lamp replacement alert suggests the lamp is reaching the end of its life cycle. Please replace it with a new one of the same model immediately.

No image displays	<ul style="list-style-type: none"> – Check for the connection between your projector and computer or image equipment. – Check for correct input signal from computer. Connection with certain notebook computer may mandate changes to its display output settings. See the user manual included with the computer for details on settings. – It takes about 30 seconds for your projector to show the first image. – Check for mode of signal, color system, image system, or computer system. – Make sure the ambient temperature is within given range [0°C–40°C(35-ECO)]. – Image does not display in BLANK mode. The BLANK button or other buttons on the remote controller.
Abnormal color	<ul style="list-style-type: none"> – Check for mode of signal, color system, image system, or computer system. – Make sure Blackboard mode is not selected in Image Select.
Some operations are invisible	<ul style="list-style-type: none"> – Check the display function.
Auto PC Adjusting function failure	<ul style="list-style-type: none"> – Check input signal. Auto PC Adjusting function is unavailable in 480p, 576p, 720p, 480i, 576i or 1080i mode.
Settings do not save after power off	<ul style="list-style-type: none"> – Make sure you have selected Store after settings adjustment. Certain settings do not keep without selecting Store.
Power management failure	<ul style="list-style-type: none"> – In case of Freeze or Blank operation, the power management function does not work.
Auto Setting does not work	<ul style="list-style-type: none"> – Make sure it is not set to "Off" in each setup menu. – Make sure "On" is not set in Ceiling function.
Image distorted or disappeared	<ul style="list-style-type: none"> – Check and revise the PC Adj. menu or Screen menu.
A password prompt displays after power on	<ul style="list-style-type: none"> – You have set up the Logo PIN Code lock function
Remote controller does not work	<ul style="list-style-type: none"> – Check the battery. – Make sure there is no obstacles stand in between your projector and the remote controller. – Make sure the remote controller is not too far away from your projector. The maximum operation range is 8m. – Make sure the remote controller and your projector are paired with the same remote control codes. – Disable the key lock of the remote controller in the Setup menu.

Appendix

Light indicator turns on or flashes	– Check status of your projector according to the light indicator status.
"X " mark displays	– Invalid operation, please operate your projector correctly.
Control panel does not function	– Disable the key lock on control panel function in the Safety option of the Setup menu.
Cannot remove the Logo Select password, Key Lock, and PIN Code lock	– Please call your dealer or service center.

- Make sure your projector is correctly connected to external equipment.
- Make sure all devices have plugged in an AC power source and have been powered on.
- If your projector fails to project image of the connected computer, restart the computer.

Note:
Your projector employs high voltage power for operation. Do not open its casing. If the problem persists, call your dealer or service center. Along with model number of your projector and a description to your problem. You will be advised on getting our services.

	8	Grounding(blue)		

Appendix

Dimensions

Support frame for Ceiling Mount
Screw: M4
Depth: 10.0

Unit: mm

Technical Specifications

Mechanical properties

Dimensions (W×H×D) :	345x261x100mm
Net Weight	3.26Kg
Adjustable foot	10°

LCD resolution

LCD system	0.63/0.59" TFT, active matrix
LCD resolution	1024x768/1280x800

Compatible signals

Color standard	PAL, SECAM, NTSC, NTSC4.43, PAL-M and PAL-N, PAL-60
HDTV signal	480i, 480p, 576i, 576p, 720p, 1080i and 1080p
Scanning frequency	Horizontal frequency: 15 kHz–100 KHz; Vertical frequency: 48–85 Hz

Optical elements

Image size (diagonal lines)	30"-300", adjustable
Projection distance	XGA:0.888m-9.099m (Frame.Max) 1.071m-10.937m (Frame.Min) XGA:0.812m-8.358m (Frame.Max) 1.347m-13.855m (Frame.Min) WXGA:0.942m-9.647m (Frame.Max) 1.137m-11.595m (Frame.Min) WUXGA:0.872m-8.932m (Frame.Max) 1.053m-10.736 (Frame.Min) WXGA&WUXGA:0.812m-8.367m (Frame.Max) 1.347m-13.869m (Frame.M
Lens (Standard Lens)	XGA&WXGA&WUXGA:F=1.6 -1.76 ,f=19.158-23.018mm Manual zooming and focusing; Zoom times: 1.2 XGA&WXGA&WUXGA:F=1.7 -1.66 , 17.5~29.01mm Manual zooming and focusing; Zoom times: 1.6
Lamp power	225W/150W(ECO. mode)

Terminal

CPMPUTER IN	Mini D-sub 15pin x1
HDMI1 terminal	HDMI A type 19 pin
HDMI2 terminal	HDMI A type 19 pin
LAN	100 Base-TX (100Mbps)/10 Base-T (10Mbps), RJ45
USB-B	USB connector (B type x1)
USB-A	USB connector (A type x1)
RS-232 terminal	D-sub 9 pin x1
AUDIO IN	Mini Stereo 3.5mm x1
AUDIO OUT	Mini Stereo 3.5mm x1
MONO(R/L)	RCA connector * 2
VIDEO terminal	RCA connector * 1

- The aforesaid specification is subject to change without prior notice.
- Liquid crystal panel is made on the basis of high standard, where 99.99% of the pixels are effective.
Due to the nature of the liquid crystal panel, a fraction of the pixels (0.01% or less) may be ineffective.

Appendix

Power

Voltage and power consumption	AC 100–240 V (Max3.6A), 50/60 Hz
Fuse	6.3A/250V
Internal speaker	10W RMS 8ohm, *1

Operating Environment

Operating temperature	0°C ~40°C (35~ ECO)
Storage Temperature	-20°C ~60°C
High land	2000 m

Remote control

Battery	AAA ALKALINE TYPE x 2(not ncluding batteries)
Operating Range	±15° about 6 m or about 8 m straight
Dimensions	110mm(L)X50mm(W)X20mm(H)
Net Weight	38g

Accessories

Owner's Manual
Quick Start Guide
Remote control and batteries
AC power cord (US Type x 1 / Euro Type x 1)
VGA cable

RS232 control mode

Serial connection

1.1 Port setting

Project	Setpoint
Communication method	Asynchronous communication
Communication rate	19200
Length	8-bit
Parity check	NO
Stop position	1
Flow control	NO

1.2 Connection mode

Can only use RS232 serial cross connect PC and projector.

Appendix

2. Basic commands

Distinguish the letter case.and enter Each command ends with [CR] (enter) .

Command	Option	Command	Option
C00	POWER ON	C07	Video
C01	POWER OFF(Immediatly)	C15	NETWORK
C02	POWER OFF	C16	MEMROY VIEWER
C36	HDMI1	C17	USB DISPLAY
C37	HDMI2	C05	VGA

2.1 POWER ON command

Command	"C00"[CR]		
Details	Power ON action. Do nothing,when you are in Power ON state . Send this command can force the end of the countdown in the countdown state.		
Return Value	Receive Successfully	[ACK] [CR]	
	Receive Unsuccessfully	" ? " [CR]	

2.2 POWER OFF command (Namely Power Off immediatly)

Command	"C01"[CR]		
Details	Power OFF action. Send this command can force your projector to power off during in power on state.		
Return Value	Receive Successfully	[ACK] [CR]	
	Receive Unsuccessfully	" ? " [CR]	

2.3 POWER OFFcommand

Command	"C02"[CR]		
Details	Power OFF action. A "POWER OFF " dialog box pops up when sending the POWER OFF command ,and do once again can force your projector to power off. Send this command can force the end of the countdownthe in the countdown state.		
Return Value	Receive Successfully	[ACK] [CR]	
	Receive Unsuccessfully	" ? " [CR]	

2.4 HDMI 1 command

Command	"C36"[CR]	
Details	Select HDMI Input.	
Return Value	Receive Successfully	[ACK] [CR]
	Receive Unsuccessfully	" ? " [CR]

2.5 VGA command

Command	"C05"[CR]	
Details	Select VGAIN Input	
Return Value	Receive Successfully	[ACK] [CR]
	Receive Unsuccessfully	" ? " [CR]

2.6 NETWORK command

Command	"C15"[CR]	
Details	Select NETWORK Input .	
Return Value	Receive Successfully	[ACK] [CR]
	Receive Unsuccessfully	" ? " [CR]

2.7 MEMORY VIEWER command

Command	"C16"[CR]	
Details	Select MEMORY VIEWER Input .	
Return Value	Receive Successfully	[ACK]CR
	Receive Unsuccessfully	"" [CR]

Appendix

2.8 USB Display command

Command	"C17"[CR]	
Details	Select RGBHV Input	
Return Value	Receive Successfully	[ACK] [CR]
	Receive Unsuccessfully	" ? " [CR]

2.9 Video command

Command	"C07"[CR]	
Details	Select Video Input	
Return Value	Receive Successfully	[ACK] [CR]
	Receive Unsuccessfully	" ? " [CR]

2.10 HDMI 2 command

Command	"C37"[CR]	
Details	Select HDMI 2 Input.	
Return Value	Receive Successfully	[ACK] [CR]
	Receive Unsuccessfully	" ? " [CR]
